Fazliddin Abdukhakimov

Backend Developer

Dear Mr/Mrs HR

Hi I'm here to tell you exactly why you hired me. So far, I have been involved in many, many different large projects. I have more than a year of practical experience. I want to share my GitHub Profile with you:

BenjaminDusse

Throughout my projects, I have faced various challenges, big and small. I often managed to solve them myself. I am currently adding Frontend programming in addition to my various knowledge. My goal is to become a Real Full Stack programmer. While preparing the backend, I have been adding and learning various algorithms together.

Thank you for attention. That's it!
